

Library plugin: General information

The scientific library dates back to the formation of the International Medical University (IMU).

Being an integral part of the university's information environment, its resource, communication and socio-cultural center, it is called upon to promote the development and support of the educational and research processes of the university, the preparation of highly qualified specialists and the humanization of education through all forms and methods of library, bibliographic and information activities .

Acts on the basis of **the Charter of the International Medical University and the Regulations on the Scientific Library of the International Medical University.**

The purpose of the library is to provide the user (reader) with access to the necessary documents and data, regardless of the form in which they are presented, where their storage location is, and what time of day they will be in demand.

Priority Tasks:

- Formation of information resources in accordance with the educational program and scientific activities of the university, interacting with educational and research units.
- Development of the library as an information and resource center, providing the educational process and the development of science with quality information, expanding user services based on new information technologies, creating a comfortable environment for research and educational activities of the university.
- Creation and development of the university's own information resources in both traditional (print) and digital formats.
- Establishment of relations with various republican, international organizations and STI communities, support of relations on the basis of equal partnership.
- Organization of access to licensed international electronic resources, information support of education and scientific research in a round-the-clock online mode.
- Promoting the development of an information culture of the individual, assisting in the formation of the research competence of students and teachers.
- Transition to an innovative path of development, achievement of a leading position in the library and information community.

The library fund covers all areas of science and amounts to 5,000 units of storage of traditional publications and 5,000 units of digital publications. It consists of teaching aids and textbooks for each discipline of the curriculum of all specialties in Kyrgyz, Russian and English.
